

Cover your wires,  
not your mistakes.

## Save Money Eliminate Post Job Clean-Up

Prevent wire damage caused by routers, spray paint, plaster, cutting tools and spray foam insulation. Stop searching for buried boxes. You work hard to keep your jobs profitable. Why allow board hangers to double the time it takes you to complete your work and collect your money?

Electrician designed Compa Covers are durable, reusable and inexpensive. The simple, easy-to-use solution saves you from fire hazard caused by chewed up wires, time lost finding and digging out buried boxes and the loss of customer confidence due to call backs and delays.

Which bucket would you rather carry up 4 floors?

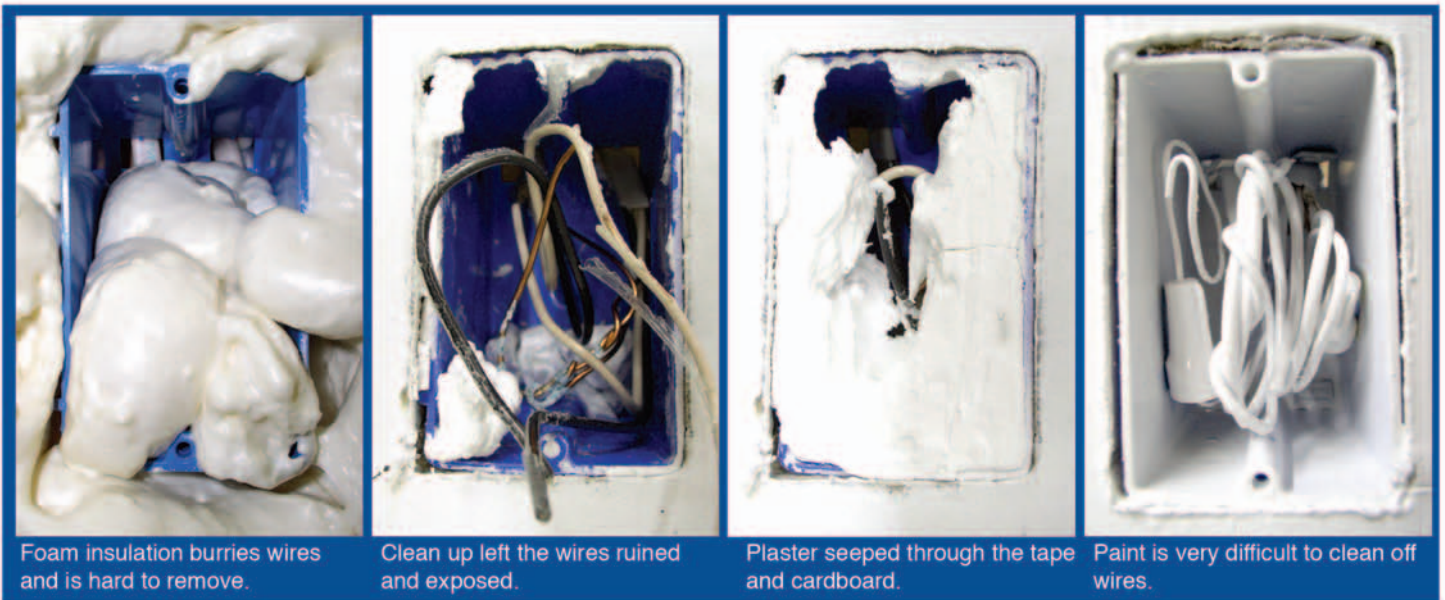

Snap-in,  
snap-out  
installation.

**Heavy Duty Polycarbonate**  
is strong enough to hold out  
cutters and routers.

**Bright Colors**  
make it easier to locate  
boxes partially obscured by  
plaster and paint.

**Raised Handle**  
provides easy removal and  
also alerts board hangers  
that there is a box under-  
neath.

**Flush Front Surface**  
forces cutting tools away  
from the wire box.

Foam insulation buries wires  
and is hard to remove.

Clean up left the wires ruined  
and exposed.

Plaster seeped through the tape  
and cardboard.

Paint is very difficult to clean off  
wires.

Part #	UPC 085937-	Description	UM
<b>Yellow: Residential Use. Fits Carlon®, Pass &amp; Seymour®, Allied Molded (P Series), Crouse Hinds® (Quick Click) and more...</b>
